To: Pontrelli, Dominic Joseph <djp5@illinois.edu>

Hello ASCE members,

We hope you all had a nice and relaxing weekend as the semester is starting to wind down. Here's some info about our upcoming general meeting with TranSystems, a series of training classes and webinars for anyone interested in becoming a LEED Green Associate, and a Sustainability in Civil Engineering Conference through Columbia University!

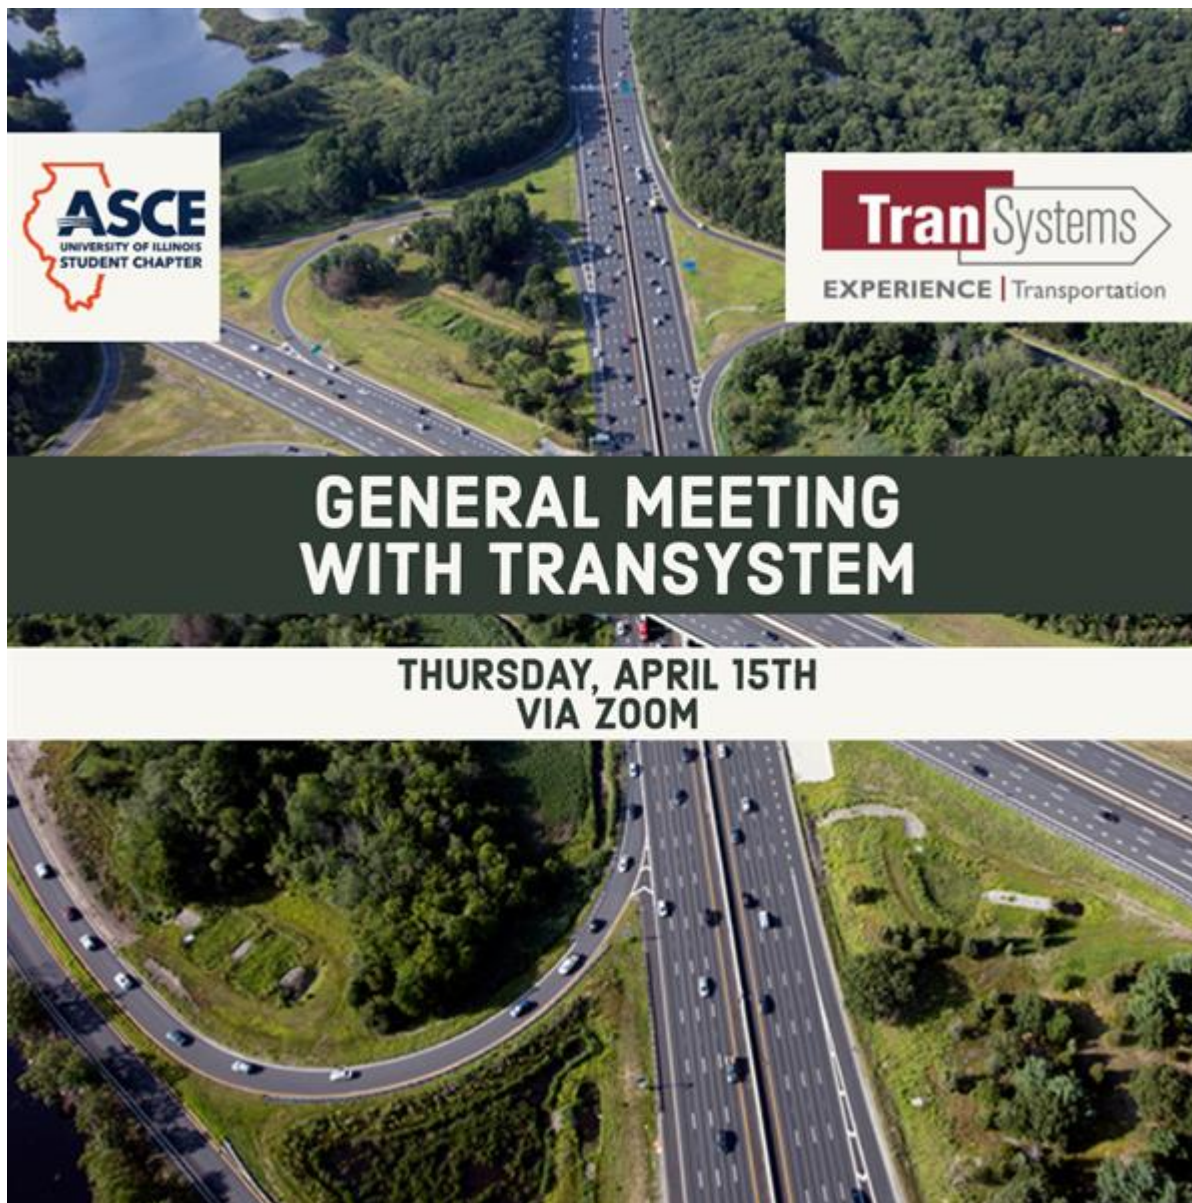

Topics included in this newsletter:

- General Meeting w/ TranSystems (April 15th)

 - LEED Green Associate Training Courses and Live Webinars

 - Sustainability in Civil Engineering Conference through Columbia University (May 13th - May 15th)
-

General Meeting w/ TranSystems

Our **final general meeting** of the semester will be with representatives from TranSystems this **Thursday, April 15th at 6 PM (CST)** over Zoom. TranSystems provides engineering and architectural planning, design and construction solutions to enhance the movement of goods and people across today's integrated transportation infrastructure. Services are delivered throughout the asset life cycle, from concept to construction to long-term operations, maintenance and rehabilitation.

You can learn more about Transystems and its projects here: <https://www.transystems.com/>.

You can also find job opportunities at TranSystems here: <https://jobs.transystems.com/search>.

If you're interested in attending, please RSVP using the CampusGroups link attached at the bottom of this email!

LEED Green Associate Training Courses and Live Webinars

A U.S. Green Building Council faculty member, Lorne Mlotek, is offering a course and a series of live webinars over the remainder of the year to prepare those taking the LEED GA exam to become a LEED Green Associate.

LEED is simply a sustainability scorecard for green buildings. As buildings can become LEED Certified, people can become LEED Accredited! The best way to break into the sustainability space is to attain the LEED Green Associate distinction. It also shows employers and clients you have certified knowledge in the field.

The service is priced at \$200, however, there is a \$50 discount available if you use the coupon code "green" at the time of purchase. There is also a \$100 fee to take the exam.

If you'd like to learn more about this opportunity, or if you would like to register for the course or a webinar, please click this [link](#).

If you have any questions, feel free to contact Lorne Mlotek at info@leadinggreen.com

Sustainability in Civil Engineering Conference through Columbia University

Columbia ASCE is hosting a virtual Sustainability Conference from **May 13th through May 15th** that will discuss sustainability and climate change adaptation in the civil engineering industry!

Tune in to hear about sustainability enforcement, civil engineering for climate resilience, construction techniques, and perspectives from the private and public sectors. Speakers include civil engineering faculty, as well as professionals and alumni from Arcadis, WSP, AECOM, Skanska, the U.S. Green Building Council, NYC DOB, MTA, DDC, and DEP. Presentations will also explore the East Side Coastal Resiliency Project, Brooklyn Grange, the Javits Center, and Moynihan Train Hall!

This is a completely **free** event and is open to anyone interested, so if you would like to register for it, you can do so through this link: <https://bit.ly/3mnuVWW>.

Thanks for reading and we hope to see you at some our events soon!
